PROJECTS

Blood Donars in RCET

The Blood Donation Agent is to create an e-Information about the donor and organization that are related to donating the blood. Through this application any person who is interested in donating the blood can register himself in the same way if any organization wants to register itself with this site that can also register. Moreover if any general consumer wants to make request blood online he can also take the help of this site. Admin is the main authority .

Customer Demand Response Service Platform based on IOT

The platform allows customers to place orders or requests for customization through a web-based or mobile interface. The platform collects data on the customer's preferences and requirements through IoT devices, analyzes the data to identify patterns and trends, and generates a list of available customization options.
